

PROJECT SHEET

N-Sea is an integrated total subsea solutions provider in Survey, IRM & Construction, Subsea Cable Repair & Installation, and UXO ID & Disposal.

We deliver total solutions for subsea infrastructures and assets that meet the needs of our clients and the international oil & gas, and renewable industries, considering a safe environment.

We want to create a sustainable business and increase our profitability through solid project management and full client awareness.

To realise this ambition we develop our organisation to the level of best in class being fully synchronised with our ambition and strategy by contributing to the following key success factors constantly:

- Qualified and engaged people
- Long term client relationships
- Strategic partnerships
- Innovative solutions
- Safety and quality 100%
- Visible presence
- Full control over marine assets

Environment, Health, Quality, Safety (EHQS)

Our EHQS policy aims to ensure alignment to the N-Sea mission, vision and strategy, where 'first time right' means ensuring that harm is not inflicted upon its employees, contractors, service providers, or the environment, N-Sea's assets, as well as members of the public affected by its operations, infrastructure and all operational activities within our scope of work.

N-Sea management and all employees are committed to create a physical, social and psychological safe working environment. We ensure the well-being and protection

of human life, environmental duty of care, protection of assets and customer satisfaction.

N-Sea has integrated safety, security, health, environment and quality requirements into all our activities so that decisions made ensure the consideration of economic development, environmental quality, and social equity to continually improve performance and achieve stakeholder requirements.

“We genuinely care. We avoid harm to people and the environment while providing quality services to our customers.”

To achieve our mission statement, we have established 4 core values that guides all employees in building their personal roles and developing our organisational culture.

We are driven to perform in accordance with the industry best practices and meet the requirements of ISO 9001 (Quality Management), ISO 14001 (Environmental Management) and ISO 45001 (Occupational Health & Safety Management) for which we are certified.

A safe working environment is vitally important to N-Sea. The safety awareness and actions of our employees play a crucial role in ensuring occupational, social and psychological safety within our organisational culture. This is reflected by our Level 3 Safety Culture Ladder certification.

GNI - Offshore and/or Nearshore Inspection Surveys 2023

Client	Gas Networks Ireland
Location	Irish Sea
Period	November 2023 - January 2024
Assets	4-Winds MacArtney Focus 2 ROTV Panther ROV Nearshore Survey Vessel

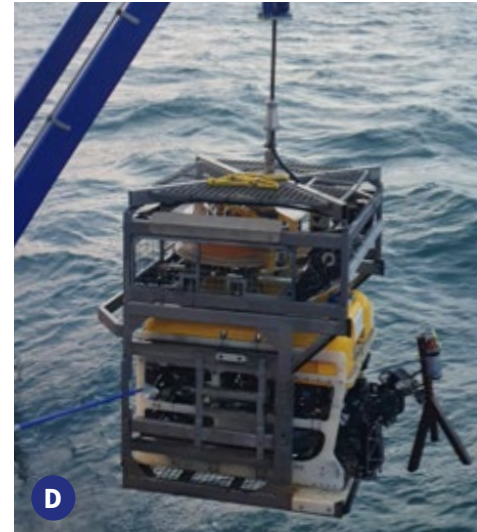

Project description

Gas Networks Ireland requested N-Sea to assist in detailed investigation works along the length of both gas pipelines (IC1 and IC2), including the Isle of Man Tee, in order to fulfil the identification of matters of potential concern along each asset. Identification of pipeline exposures, as well as video inspection of identified targets of interest were part of the scope, together with numerous other key techniques which are effective in identifying a wide range of concerns. The programme was designed to incorporate both the use of SSS and ROV spot dives to ensure continued safety of the pipelines.

Scope of work

Elements surveyed are indicated below and in short, they are described as:

- The Gas Interconnector Pipeline No. 1 (IC1), with a length of approx. 204km;
- The Gas Interconnector Pipeline No. 2 (IC2), with a length of approx. 192km;
- The Isle of Man 'Tee', installed on IC2 in 2002 at approximate KP 125, comprising a subsea 'Tee' (valves and 8"/10" piping) and protection structure.
